#2
SEX

I think, excuse me I know, it is the opinion or the desire of a large majority that if you have HIV/AIDS that you should no longer be sexually. I see nothing wrong with this as long as it is a decision reached by the individuals with the virus/disease, and not the fears of those individuals who are not being forced on them. The American way, make the victim responsible. The responsibility of protection is an individual one, however in order for us to stop the spread of AIDS/HIV must be a collective effort. It must be an effort of people from all walks of life that band together and demand some explanation from our governments for the continual death of our loved ones.

HIV+/or HAVE AIDS

IM NOT THROUGH IT ALL YET! IM IN THE THICK OF IT NOW.
SURROUNDING MYSELF WITH THOSE I HOLD DEAR.
MAKING PREPARATION FOR THE DEMONS ASSAULT.
CONFRONTATION WITH THE BEAST IS INEVITABLE,
FACE HER---I MUST
